Congratulations to **Dr. Narin Sontigun**, lecturer of WU Akkhraratchakumari Veterinary International College on her achievement in publishing research paper in Q1 Scopus ISI, Acta Tropica .

Educating the next generation in the SDGs

Educating the
next
generation in
the SDGs

The growing climate crisis has led to universities around the world looking at what they can do improve sustainability in their communities. Key to addressing this challenge is education and as part of Walailak University’s efforts, Associate Professor Dr. Phimphaka Harding of the School of Science in her first year chemistry class has asked her students to prepare short videos on ‘Chemistry and the UN’s Sustainability Development Goals’. The UN Sustainability Development Goals, or SDGs are a framework designed to create a better, more sustainable future for all.

The students were split into groups with each group given one of the seventeen SDGs which range from SDG1 – No Poverty to SDG4- Quality Education to SDG17 Partnership for the Goals. In making the videos, the students gained a deeper understanding of the SDGs and the impact that chemistry can have on a more sustainable future. Because of the current pandemic, the students have had to work together virtually helping them develop teamworking and online collaborative skills that will be vital for them in their future careers. We encourage you to take a look at the videos they have created here: www.youtube.com/playlist?list=PLfcSi8k2Wy7fk9BHDaq71TUtajTxPpOo-.

VOLUME XI AUGUST 2021

Mora bright - Nora serum, New research product for commercial by WU Researcher

สารสกัดจากส้มแขก และเปลือกมังคุด ช่วยลดริ้วรอย ชุ่มชื้นผิว และปกป้องผิว

นักวิจัย ม.วลัยลักษณ์ พัฒนาผลิตภัณฑ์ Nora serum “เซรั่มสารสกัดจากเปลือกมังคุดและส้มแขก ช่วยลดริ้ว รอยฝ้า กระ จุดด่างดำ”

Assistant Prof. Dr. Moragot Chatatikun, lecturer of School of Allied Health Science and member of Innovation and Health Products Excellence Center, Walailak University revealed that her research team from Walailak University and Chulalongkorn University had studied the extraction of Som-khaek or Garcinia atroviridis and mangosteen peel. The researcher used **Nano-emulsion** technology, and Nora serum to product the new products under brand “**Mora bright**” to serve customers who have a problem of spot, blemish, melisma, and freckle. “**Mora bright**” was rewarding a silver medal from National Research Council of Thailand (NRCT) in 2020. More over this research published in Pharmacognosy Journal in year 2020, and won the 1st prize of Startup Prototype Showcases of the Entrepreneurial university from the project of Walailak Entrepreneurial Ecosystem Development 2020 by her student team. The product can be order from <https://www.facebook.com/morabright.official> .

Dr. Poonpong Boonbrahm
Dean of School of Informatics, Walailak University
泰國瓦萊麗大學資訊學院 院長

Assoc. Prof. Dr. Poonpong Boonbrahm, Dean of School of Informatics, Walailak University was invited by Changhua Christian Hospital (CCH), Taiwan to present on the topic of "Health Care Technology for Patient Safety in Thailand" on August 27 August, 2021 at the international conference to celebrate the 125th CCH Anniversary. His talk focused on "Augmented Reality in Healthcare". The conference co-hosted by Walailak University - the Center for International Affairs (CIA).

"Patient-centered" and "Patient Safety" are the core concepts and goals of medical hospitals and health institutions at home and abroad to promote medical quality, and they are also the criteria for moving toward a high-trust organization; Taiwan Patient Safety Promotion Association has been for many years Committed to promoting patient safety culture, enthusiastically counseling hospitals at all levels, and holding observation meetings and workshops to promote patient safety.
