

Public health And Medical Care

Connecting Cambodia, China, Laos, Myanmar, Thailand and Vietnam together with a 4880-kilometer-long river, the Lancang-Mekong region has dynamic internal exchanges and a strong bond among its residents, making “Shared river, shared future” not only a slogan but also the authentic spirit of Lancang-Mekong cooperation. The pandemic caused by COVID-19 has influenced the region continuously and profoundly, showing the “Deficit of Public Health Cooperation” in the Lancang-Mekong region. The situation is appealing the youth to take action, helping to create a safer and healthier future for the region. Through joint efforts, people in the Lancang-Mekong Region can overcome the difficulties and win the fight against the virus, thus safeguarding people’s health and security.

1. The Improvement of Healthcare Infrastructure

Healthcare infrastructure played a significant role in fighting the pandemic. Creative ideas to improve the healthcare infrastructure will provide assistance to trauma recovery.

2. The Innovation for Transnational Information Transparency

Previous experience has illustrated the significance of information transparency in controlling andemic. Given that, how to promote transnational transparency through online and offline approaches?

3. The Improvement of Medical Resources Distribution

Can you develop an adaptable resource sharing control policy to supply continuing optimization of medical resource distribution? How to target the people who need the resources most?

4. Promoting the Whole-of-Society Approach to Face Public Health Emergencies

Coping with public health emergencies is not merely a duty of administration, mass of people can also make contributions to this issue, like instantly reporting relevant information and putting forward effective suggestions for public health governance. WHO puts a whole-of-society approach, which means government engaging all stakeholders including the civil society, communities, academia, media, private sector, NGOs, other voluntary associations, families, and individuals to strengthen the resilience of communities and society as a whole. What is your idea in promoting this approach?

5. Win-win Approach for Balancing For-profit Medical Supply and Public Health Well-being

For public health care, affordable medical supplies are indispensable. Yet the economic income of enterprises is by no means to be ignored. What can we do to balance these two aspects and achieve win-win outcomes through organic cooperation?

6. Efforts in Helping Build up a Public Health Emergency Response System

Immediate and effective measures in response to emergencies are vital in public health governance. As people's consensus, mass storage, in-time update, and quick query are the key factors in the response system. Furthermore, suggestions can be given to develop a convention, agreement or other international instrument on pandemic preparedness and response – a so-called 'Pandemic Treaty'. As for you, are there any other aspects that should be included in the system?
